

Mobile protective screens

303/B2 and 303/B3

These mobile x-ray protective screens have a solid panel design with a lead core. All screens are finished on both sides with a high pressure, plastic laminate. Other colours are available to order. They are edged in white ABS thermoplastic edging which is also impact resistant. Protection across the shield is 2.2 mm lead equivalent. Screens have robust legs with high quality, lockable castors, and are fitted with handles for easy movement.

Shields above shown in turquoise blue 014 (colour is shown as a guide only)
